 Seats of the House, and More

竹沢泰子

Henri Mita's Story and the Pacific War

The seat of the House of Representatives was decided by ballot. The authorities were not happy with the result. The new seat was not as good as the old one. The government was concerned about the political situation and decided to move the seat again. The new seat was located in a more suitable area. The authorities were satisfied with the new seat.

ソフトウェードの増額も Agree to the increase of software spending.

 Peoples of all ages

At the age of 32, Henri Mita started his career as a software developer. In recent years, he has been involved in a number of software projects. He has also started his own software company.

The software was initially developed for the company's internal use. However, due to its success, the software was released to the public.
